**SIUe**

# Group Activity (60 min)

Sketch **3** very different initial designs for your interface:

- Each design supports **4** tasks, but *not necessarily* the same 4.
- Sketch key aspects to show the functionality in the 4 tasks. Do not illustrate the entire design.
- Sketches should be rough (i.e., not digital mockups). Include arrows showing transitions and relationships.

You will use this as a starter for your **2F** submission.
