### Assignment 1a

#### Community + Domain:

- Rural Communities and Education
  - o Online learning in schools
- Rural Communities and Business Relationships
  - o Business relationships with each other and their customers
  - o Business relationships with their communities
- Disabilities and Recreation
  - o Physical barriers between a person and the environment

#### Ideas:

- Within the domain of education, especially in rural communities, there seems to be an issue of poor internet connection. This causes students to not reach their full potential and get the education they deserve. How can we provide a better internet connection to help students learn?
- Within the domain of recreation, people with disabilities may not be able to participate in the same leisure activities as those who are not disabled. What technologies do not yet exist that could help people who are disabled better enjoy their free time?
- Rural businesses are not getting enough new and existing customer interaction along with interaction from other businesses in their area. How can we connect customers and businesses to each other?
